

Beyond Green Cleaning

Algae Eater™

-  **Powerful** - A revolutionary, microbe-powered algae remover.
-  **Effective** - Designed to safely remove algae stains from a variety of hard surfaces.
-  **Versatile** - Forms a barrier that prevents the re-appearance of algae, moss or lichen for at least six months.
-  **Easy-to-use** - Does not require scrubbing or pressure-washing - just spray and leave.
-  **Safe** - Bio-based and all-natural ingredients.

What is Algae Eater™?

Algae Eater™ is a powerful blend of microbes that removes algae from a variety of hard surfaces. Algae Eater™ is an all-natural and highly-efficient alternative to standard hazardous chemicals which require hard scrubbing or damaging power-washing. It renews the appearance of algae-covered surfaces making them look new again. Conventional cleaners, like chlorine-based products, require multiple treatments and only last a few weeks. In fact, when using chlorine-based products (which are 99% water), they create more algae growth than they remove. Algae Eater™ creates a barrier on the treated surface to protect and prevent algae build-up for at least six months.

Where to Use?

Algae Eater™ can be used on all hard surfaces, including wood, brick, stone, masonry, siding and other hard surfaces affected by algae. Algae disfigures and degrades many types of vertical and horizontal surfaces. Not only is algae an eye-sore, it can be damaging to surfaces as well.

How to Apply?

Apply Algae Eater™ with a trigger sprayer or hand sprayer, soaking the entire affected area to ensure the surface to be treated is thoroughly wet. The stain will disappear in 48 hours or less. After the algae disappears, rinse with low-pressure water to remove dirt and grime. The algae stains will not return for at least six months. Re-apply every six months to avoid any re-occurring growth of algae. On heavy build-up, a second application may be needed.

How is It Packaged?

It is packaged in - 750ml, 5L, 20L

Product Advantages

**Removes algae
from hard
surfaces.**

**Treatment lasts
up to six months.**

**No bleach, quats
or other toxic
chemicals.**

**Easy and safe to
use.**

Product Specifications

pH:	Neutral
Color:	Amber
Flash Point:	None
Odor:	Pleasant
Rinsability:	Excellent
Biodegradability:	Complete
Phosphate Content:	None
